IMILAB Home Security Camera Basic
User Manual

Read this manual carefully before use, and retain it for future reference

Product Overview

Package Contents: IMILAB Home Security Camera Basic, user manual, wall mounting accessories pack, usb cable

Product Installation

The IMILAB Home Security Camera Basic can be placed on a number of horizontal surfaces, such as a writing desk, dining table, and coffee table. It can also be mounted on the wall.

Mounting the Security Camera on a Wall

1. Drill two holes on the wall by using the base of the security camera as a template. It is recommended that you mark the locations of the holes with a pencil before drilling. The diameter of each hole is approximately 6 mm, and the depth is approximately 25 mm.

2. Insert the two plastic anchors into the holes on the wall.

3. Make sure to position the base unit so that the arrow is pointing up. Secure the base unit in place by tightening the screws into the plastic anchors.

4. Match the grooves on the bottom of the camera unit with the raised area on the base unit. Press down until the two surfaces are flush, then turn the camera unit in either direction to lock it in position.

⚠ When mounting the security camera on a wall: please note that the wall must be able to support at least triple the product's total weight.

Product Instructions

- Set up your system

Connect the USB adapter to the device and plug it in. The indicator of camera will turn yellow.

- Get the MI Home APP

For the best experience, please Download the Mi Home app for your smartphone by scanning this QR or search for MI Home in the APP store.

Precautions

- The suitable operating temperature range for this product is between -10 °C ~ 40 °C. Please do not use the product in an environment with temperatures above or below the specified range.
- The security camera is a precision electronic product. In order to ensure its normal operation, please do not install the device in an environment with high humidity levels or allow water to enter the product.
- To improve the product's performance, please do not place the camera lens facing or next to a reflective surface, such as glass windows/doors and white walls, which will cause the image to appear overly bright in areas close to the camera and darker in areas further away, or cause the camera to produce white images.
- Please install the product in areas with Wi-Fi reception, and try to place the device where the Wi-Fi signal is strong. In addition, please keep the security camera away from metal structures, microwave ovens, or other locations where signal strength may be impacted.

Specifications

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

– Consult the dealer or an experienced radio/TV technician for help.

FCC 20cm Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC ID: 2APA9-IPC016A

WEEE Disposal and Recycling Information

Correct Disposal of this product. This marking indicates that product should not be disposal with other household wastes through out the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environment safe recycling.

Adaptor Statements

For pluggable equipment, the socket-outlet (power adaptor) shall be installed near the equipment and shall be easily accessible.

Hereby, Shanghai Imilab Technology Co., Ltd. declares that the radio equipment type IMI Home Security Camera Basic is in compliance with Directive 2014/53/EU.
